IT will be a relief to the country to know that Cleveland is married, and that there will soon be an end to all the twaddle that is flashed along the wires all over the continent in regard to the matter. If there is anything that beats American flunkeyism on occasions like the present, we have yet to be informed thereof.

FLOODS, cyclones, strikes and dynamite are the current disasters of the year. Such things might, however, be expected with six comets in sight and several big sun spots, to say nothing of the total eclipse of the sun that will soon be here. Fortunately this last will only be served up to observers in torrid latitudes. About this time, ye people of the howling West, look out for a cupful of wind.

THE Mahommedan religion is somewhat in advance of modern American Mormonism. It permits only four wives. If the first wife objects the husband cannot bring a second wife under the same roof, and she can prevent him from marrying another unless he is able to keep up a separate establishment for her. Surely the path of the Turkish husband is hedged about with difficulties such as would be gall to the spirits of the faithful among the Latter Day Saints of free America.

THE Register and Receiver of the United States Land Office in this city yesterday received a telegram from Commissioner Sparks, suspending all pre-emption, timber culture and desert land filings or entries until further orders. This, in the absence of the repeal of these land laws by Congress, seems like a sweeping act of usurpation. It will work great hardships on many poor and deserving men who have made preparations to take up claims, and the utmost that can be done by such people is to tender their fees to the officers and have the rejection noted on their papers, so that they may secure to themselves the subsequent right of appeal.

THE New York Medical Record says that "one-half of the adult men in America living in our cities are bald, headed." It would seem, unless there is a change, that the time is coming when small boys who stand on street corners and shout, "Go up, thou bald-head!" will only be dealing in facts. But science and good sense should unite and save the Nation from baldheadedness. Avoidance of the unventilated, close-fitting hat and the soapy shampoo, with better attention to the scalp, may yet avert such a disaster. Men do not lose their beard; it receives the air and sunlight. Women seldom lose their hair and become bald from facts very plainly point to the cause of the trouble. It is too late to save the old fellows, but the boys and young men should heed the lesson.

THE WEDDING.

President Cleveland and Fair Miss Folsom

DULY MARRIED AT THE WHITE HOUSE

The Ceremony and Decorations—The Newly Married Pair Go to Deer Park, Maryland, for their Honeymoon.

Associated Press Dispatches to the Times.

WASHINGTON, June 2.—Other weddings there have been at the White House, eight in all; but never before to-day has the highest dignitary in the land bowed his head within its historic walls to receive the blessing of the church on his union in the holy bonds of matrimony. From the very dawn of the wedding day the city seemed alive to the approaching event. Little knots of idlers talked it over on the sidewalks in front of the hotels. Sedate matrons gossiped as they passed along the streets, and bevies of laughing girls chatted and speculated about the coming momentous ceremony. Many were the curious glances that sought to pierce the draped windows of the White House, and numberless were the comments and speculations of the loiterers who gathered, early in the afternoon, within the grounds. Little or nothing in the appearance of the mansion or its surroundings indicated to the passerby that the much-talked-of event was at hand. The murky haze of the early forenoon had wholly given place to a clear sky, and warm, southerly breezes, while the yellow, slanting sunbeams filtered through the foliage of the park and made flickering pictures upon the velvety turf beneath. The great fountain did its best to attract attention, spouting its cooling spray to the verge of its granite basin, and flowering shrubs and tropical green filled the marginal gaps in the picture. The seats in the park across the avenue were occupied by lawn clad maidens, where half the young lovers in town, moved by the common sympathy which stirs the romantic susceptibilities of sixty million took the winding walks in the line of their evening promenade, and speculated upon the emotions which are supposed to fill the hearts of the bride and groom. The successive arrivals of guests were watched with interest, and their names were whispered by the more knowing ones to their companions. Suddenly the strains of the wedding march floated through the open windows, and there was a general exclamation from the outside crowd. "The services have begun." Then there came a tantalizing hush within the walls, which was soon ended by the strains of the Bridal Chorus from Lohengrin, and it was thereby known that the ceremony was over. One by one lights sprung up at the windows, and the great burners on the portico cast their effulgence over the pavements. The scene resembled a summer night's festival, and the crowd gave itself up to the enjoyment of the delightful music. With short intermissions the fine orchestra rendered the following selections: Bolero, "La Rosa," by Mariani; "Invitation to the Waltz," by Weber; "Spring Song," by Mendelssohn; romance, "Bright Star of Hope," Robandis, and "Mosaic Desiree," by Sousa.

THE CEREMONY.

The President and Miss Folsom Married by Dr. Sunderland.

WASHINGTON, June 2.—Miss Folsom arrived in Washington shortly after 5:30 this morning and was met by Col. Lamont. She was escorted by Col. Lamont to a carriage, and driven direct to the White House with Mrs. Folsom and Mrs. Rogers, of Syracuse. There was a slight misty rain falling when the train arrived, but it cleared away.

THE WEDDING GUESTS.

About half past 6 o'clock the wedding guests began to arrive at the White House, carriages drawing up to the main door on Pennsylvania avenue. The first arrival was Secretary Lamar. He was closely followed by Rev. D. Sunderland and wife, and during the next few minutes there came, in quick succession, Postmaster General Vilas and wife, Wilson S. Bissell, Secretary and Mrs. Endicott, Secretary Bayard, Secretary and Mrs. Whitney, and Secretary Manning and his wife. Removing their wraps in the state dining room, all the guests proceeded to the Blue room, where they were received by Miss Rose Cleveland. For a few minutes the guests chatted gaily, but conversation was quickly suspended, and to the strains of the selected orchestra from the Marine band, stationed in the corridor, struck up the familiar strains of the wedding march from Mendelssohn's Midsummer Night's Dream, and all eyes were turned to the doorway to catch the first glimpse of the coming bride and groom. Starting from the west-room corridor on the upper floor the President came slowly down the western staircase with his bride elect leaning on his arm. They were unaccompanied, even the bride's mother awaiting her with the other guests.

GROOM AND BRIDE.

Passing through the central corridor the bride and groom entered the Blue room and took a position near its southern wall, which was completely hidden from sight by a mass of nodding palms, tropical grass and an enfolding drapery of choice flowers. A crystal chandelier poured a flood of mellow radiance upon the scene and the colors of the massive banks of scarlet begonias and tropical Japanese rose, mingled with the blue and silver tints of the frescoed walls and ceiling, gave a warm and glowing tone to the whole brilliant interior. The delicate ivory shades of the bride's wedding gown found an exquisite setting in the masses of crimson roses immediately beyond. The President was in full evening dress, with a turn-down collar, lawn necktie, and white studs. A hush fell upon the assembly as Dr. Sunderland stepped forward to his position fronting the wedding couple, with Rev. William Cleveland, the President's brother, at his left hand.

THE CEREMONY.

In a distinct voice and with deliberate utterance the doctor began the simple and beautiful wedding service as follows:

"Forasmuch as we are assembled to observe the holy rites of marriage, it is needful that we should seek the blessing of the great God, our Father, whose institution it is, and therefore I beseech you now to follow me with reverent hearts in prayer to Him."

Prayer was then spoken as follows:

"Almighty and ever-lasting God, father of our spirits, framer of our bodies, giver of every good and perfect gift, Thou who canst see the end from this beginning, who knowest what is best for us, thy children, and hast appointed the holy rite of marriage to be sacredly observed throughout all generations, regard now we beseech thee, Thy servant, our Chief Magistrate; endow him plenteously with Thy grace and fill him with wisdom to walk in Thy ordinances. Be very nigh to him in the midst of many cares and grave responsibilities day by day. May Thy law direct him and Thy strength uphold him, and be Thou forever his sun and shield. Bless Thou graciously pleased to look down upon this, Thy daughter, even as Thou didst favor the chosen Rebecca and many noble women that have adorned the world. May she indeed be a precious boon of good to her husband," to cheer and help him continually, shedding the sweet influence of a Christian life upon the Nation, in whose sight she is to dwell. With Thou approve what we, Thy servants, come to do in Thy name, by Thine authority, and under the laws of the land in which we live, and graciously assist them, this man and this woman, who are here to be united in the bonds of holy wedlock according to the institutions of Thy words. Mercifully be pleased, Almighty God, to vouchsafe to each of them Thy grace, that they well and worthily weigh the vows which they are now about to make to each other in the presence of this company, and before Thee, and that they may be enabled hereafter at all times so to live together as to rejoice in the solemnization of this union with joy unspeakable and full of glory through Jesus Christ, our Lord, amen."

At the conclusion of the prayer, addressing the company, Dr. Sunderland said:

"Marriage is honorable among all men, in that man shall leave his father and mother and shall cleave unto his wife and they twain shall be one flesh. It was constituted by our Creator in the first paradise. It was confessed by patriarch and priest, people and apostle. It was confirmed by the teaching and adorned with the presence of the Redeemer, and has been honored by the faithful keeping of all good men and women since the world began. It is not, therefore, to be undertaken lightly or unadvisedly, but soberly, discreetly and in the fear of God. Into this holy estate this man and this woman come now to enter. If any can now show cause why they may not be lawfully united in marriage, let him now speak or else hereafter forever hold his peace."

To the bride and groom: "If you desire to be united in marriage, you will signify the same by joining your right hands." The groom and bride joined hands.

"Grover," said the minister, "do you take this woman, whom you hold by the hand, to be your lawful wedded wife, to live together after God's ordinance in the holy estate of wedlock? Do you promise to love her, cherish, comfort and keep her, in sickness and in health, in joy and in sorrow, and forsaking all others, keep you only unto her, so long as you both shall live?"

The groom, firmly: "I do."

Dr. Sunderland—"Frances, do you take this man, whom you hold by the hand, to be your lawful husband, to live together after God's ordinance, in the holy estate of wedlock? Do you promise to love him, honor, comfort and keep him in sickness and in wealth, in joy and in sorrow, and forsaking all others keep only unto him so long as you both shall live."

The bride responded in a low, but clear voice: "I do."

Dr. Sunderland, solemnly—"For as much as Grover and Frances have here agreed and covenanted to live together after God's ordinance in the holy state of wedlock, and have confirmed the same by giving and taking the wedding ring now, therefore, in the presence of this company, in the name of the Father and of the Son and of the Holy Ghost, I pronounce and declare that they are husband and wife, and what God hath joined together, let no man put asunder."

Rev. Mr. Cleveland then pronounced the following benediction:

"God, the Father, God, the Son, and God, the Holy Ghost, bless, preserve and keep you. The Lord mercifully fill you with all temporal and all spiritual blessings and grant that you may so live together in this world that in the world to come you may have life everlasting. Amen."

AFTER THE WEDDING.

Congratulations Received—Bodkin Reporters Off for Deer Park.

At the conclusion of the ceremony Mrs. Folsom, showing traces of deep emotion, was the first to tender her congratulations to the newly-married pair. She was followed by Miss Cleveland, Rev. Mr. Cleveland and other relatives and friends in turn. While the congratulations were in progress the bands under the leadership of Prof. Sousa performed the Bridal Chorus and march from Lohengrin, and to this music the bride and groom gracefully led the way into the state-ly East room. The adornment of this noble hall were in keeping with its majestic proportions, and its ample space and brilliant illumination afforded an opportunity for a fitting display of the ladies' toilets. The bride wore an enchanting wedding dress of ivory satin, simply garnished, on a high corsage with India muslin dressed in Grecian folds and carried in exquisite falls of simplicity over the petticoats. The orange blossom garniture, commencing upon the veil in a superb coronet, is continued throughout the costume with artistic skill. Her veil of tulle, about five yards in length completely enveloped her, falling to the edge of the petticoat in front and extending the entire length of her full court train. She carried no flowers and wore no jewelry except an engagement ring containing a sapphire and two diamonds, and the plain gold wedding ring which had been placed on her finger before she descended the staircase.

The east room and the red and green parlors were decorated in the style usual at receptions and state dinners. From the east room the company proceeded, after a brief period of greeting and conversation, to the family dining-room of the mansion, where the wedding supper was served.

After the guests had proceeded to the dining-room, there was no formal order observed in the supper room, but the collation was served, and the guests sat at small tables or slowly promenaded in the room as they discussed the menu and chatted over the event of the evening. Elegantly designed souvenirs of satin boxes containing pieces of bridal cake, and each one bearing a hand-painted monogram, "C.-F.," were presented, and excited great admiration.

While the orchestra was playing one of its liveliest selections and the guests were gathered about the tables, the bride quietly slipped away to her room and changed her wedding dress for a handsome gray and brilliants. The presents from the Cabinet officers and their wives were mostly articles of jewelry, though there were several beautiful presents of silverware.

Just as the wedding ceremony began a presidential salute was fired by a battery of artillery near the river and the chime of bells of the Metropolitan M. E. church pealed forth Mendelssohn's wedding march and the bells in the other churches joined in the happy salute.

CHARY OF KISSES.

The gentlemen present at the wedding were not fortunate to receive a salute from the bride, who confined her kisses to the ladies. Otherwise the ceremony was orthodox in form.

The executive mansion will be open to-morrow and photographers have already received permission to perpetuate the features of the elaborate decorations of the interior.

The arrangements for the day's event were under the control and personal management of Col. Lamont, and they worked so smoothly and satisfactorily as to earn for him universal commendation and compliment.

QUEEN VICTORIA'S CONGRATULATIONS.

LONDON, June 3.—The Queen has sent the following message:

"*To President Cleveland:* Pray accept my sincere congratulations on your marriage and my best wishes for your happiness."

A NEWSPAPER'S COMMENTS.

LONDON, June 3.—The Daily Telegraph this morning, commenting on President Cleveland's marriage, says: "It was a graceful act on the part of Mr. Cleveland to show that the President of the United States does not derogate from his exalted position by making his wedding of the plainest and simplest character."

ANARCHISTS SENTENCED.

Herr Most and His Followers Sent to the Penitentiary.

NEW YORK, June 2.—Johann Most, the Anarchist, was to-day sentenced to the penitentiary for one year and fined $500. His associate, Brausschweig, got nine months in the penitentiary and was fined $250. Schenck was sent to the penitentiary for nine months but was not fined. None of the prisoners attempted to speak a word in court. They were taken back to the Tombs, and this afternoon will be transferred to Blackwell's Island.

Mourning for John Kelly.

NEW YORK, June 2.—Mayor Grace, to-day, ordered the flags on the City Hall to be placed at half-mast in respect to the memory of John Kelly.

NEW YORK, June 2.—Arrangements for John Kelly's funeral were completed this afternoon. A requiem mass will be celebrated in the Cathedral at 10 a. m. on Saturday by Archbishop Corrigan, who will be assisted by Monsignor Farley. Monsignor Preston will deliver the sermon. Throughout the day prominent citizens called and sent cards to the house. Telegrams of condolence came from all over the country. The board of Aldermen, to-day, adopted resolutions paying tribute to the memory of Kelly, and ordering that all the public offices be closed on the day of the funeral.

Dr. Bowers Sentenced to be Hanged

FOR MURDERING HIS WIFE BY POISON.

Railway Communication Interrupted by Floods at Albuquerque—San Francisco Jury-Fixers Held for Trial—Etc.

Associated Press Dispatches to The Times.

SAN FRANCISCO, June 2.—Judge Murphy this morning sentenced Dr. J. Milton Bowers to be hanged for the murder of his wife by poisoning, in order to obtain $17,000 insurance on her life. Before sentence was pronounced Bowers was asked if he had anything to say why sentence should not be passed upon him. In a few and scarcely audible words he protested his innocence. When the judge pronounced the fatal words his voice broke several times, and at the conclusion he seemed completely overcome. Bowers, however, took it calmly. When the sentence was finished he sat down, folded his arms and betrayed no emotion whatever. His counsel are allowed ten days to prepare their exceptions, after which, if unsuccessful, a day will be set for the execution.

JURY FIXERS HELD.

In the Police Court, to day, Micah Doane and Richard Creighton, the alleged jury bribers, were held to answer before the Superior Court in $10,000 bail each.

At the afternoon session of the court Frank D. Northey was also held to answer with bail fixed at $10,000.

A PRIVILEGED.

Solomon Hirsch, aged 64, and his wife Emily, aged 46, were discovered dead this morning by their son Leo, in their room at 954 Larkin street. The couple had been asphyxiated by the escape of gas from a tube connecting with the gas burner.

DIED FROM HIS INJURIES.

Charles Hautman, a native of England, aged 26, a sailor, was brought to the receiving hospital this morning suffering from erysipelas superinduced by wounds received in the face and from the effects of which he died this evening. As yet no traces have been found of the perpetrator of the deed but it seems most probable that Hautman received the injuries that were the indirect cause of his death in a drunken brawl in some water front saloon.

FLOODS.

Railway Traffic Seriously Interrupted at Albuquerque.

ALLBUQUERQUE, N. M., June 2.—The last transfer of passengers and baggage over the damaged railroad bridge at Isleta has been made, and in consequence no trains from the West over the Atlantic and Pacific and from the South over the Atchison, Topeka and Santa Fe will arrive in Albuquerque until the bridge is fixed and declared safe for the passage of trains. It is stated that the bridge cannot possible be repaired under a week, as the high waters have undermined a number of spans which will have to be built anew. The Rio Grande is higher now than it was in 1883, when it reached its highest point in the past ten years.

NATIONAL NOTES.

An Order Suspending Applications to Enter Lands.

WASHINGTON, June 1.—The following circular was issued from the General Land Office to-day:

To Registers and Receivers of the United States Land Offices—GENTLEMEN: The repeal of the pre-emption timber-culture and desert-land laws having been the subject of consideration by Congress, all applications to enter lands under said laws are hereby suspended from and after this date until the first day of August, and you will not allow filings of applications for entry under said laws during said time.

(Signed) WM. A. J. SPARKS, Commissioner.

Approved L. Q. C. LAMAR, Secretary.

A BILL FOR UNION PACIFIC.

The House Committee on Pacific Railroads has agreed to report favorably Dorsey's bill authorizing Union Pacific to construct branch lines. The report will not be presented to the House, however, until some action is had by that body upon the Extension bill now the special order for consideration next Saturday.

EDUCATION FOR UTAH.

In the Senate to-day Mr. Blair submitted a proposed amendment to the Bloody Civil Appropriation bill to make an appropriation to aid in the establishment of schools in Utah under the direction of the Industrial Christian Association of Utah, and to provide for wide employment, homes and self-support for the dependent class in that Territory with a view to aid in the suppression of polygamy therein.

A MEAN-TH F. Goodrich has married Senator Quilom to-day introduced in the Senate a join resolution proposing the following amendment to the Constitution:

"The only institution or contract of marriage within the United States or any place subject to their jurisdiction shall be that of a union in marriage of one man with one woman, and bigamy and polygamy are forever prohibited; any law, custom, form or ceremony, civil or religious, to the contrary notwithstanding."

"SEC. 2. No State shall pass any law or allow any custom, form or ceremony of marriage except in obedience to and conformity to the institution of marriage as herein-before established. But otherwise the regulation within each State of marriage and divorce, and the civil and final jurisdiction over these subjects, shall belong to the several States as heretofore."

"SEC. 3. Congress shall have the power to enforce this article by appropriate legislation."

APPOINTED POSTMASTER.

O. C. Drew was to-day appointed postmaster at Knights Ferry, Stanislaus county, Cal.

Death of an Old Pioneer.

DENVER, June 2.—Hon. Frank Tilford, a prominent California and Nevada pioneer, died here, this evening, of congestion of the liver. Mr. Tilford went to San Francisco from Kentucky in 1845. While in California he was elected State Senator. During Buchanan's administration he was appointed United States Attorney of Utah.

To Be Hanged.

COLUSA, June 2.—To-day no word of interference has been received from Gov. Stoneman, and consequently active preparations will begin in the morning for the execution on Friday of Charles Dewitt, for the murder of a woman at Willows, May 15th, 1885.

A Sunstroke.

GRIDLEY, Cal., June 2.—John Vogel, a native of Germany, aged forty-five, had a sunstroke this afternoon and died. It is the first case known in this county.

Death of Henry Havemeyer.

BABYLON, L. I., June 2.—Henry Havemeyer, the sugar refiner, died suddenly at his home near this place this morning.

A Battalion Drill.

Two squads of Companies A and C of the Seventh Infantry battalion, National Guard of California, had a practice drill at their armory last night. The drill corps was under the command of Major W. H. H. Russell, and devoted itself mainly to fancy evolutions to be repeated at the Grand Military Ball of the Seventh battalion, to be given on the 9th inst. by them at Armory Hall. There were marches, countermarches, common-step and quick-step evolutions, hollow square maneuvers and formations of Greek crosses, of all which exercises the drill corps acquitted themselves to perfection under the word of command of their efficient major. There is no doubt but that the fancy drill will be one of the main features of the ball.

The Delayed Mail.

The delayed Eastern mail of four days which had accumulated at Albuquerque, by reason of the washout, arrived by the Atlantic and Pacific train at noon yesterday. The mail reached the Postoffice at 1 o'clock. There were three mail sacks, containing about 13 000 letters and an endless quantity of papers. By 6 o'clock the distribution had been effected and the carriers started out. Many hearts in the city were made glad by belated dispatches from "the folks" back East.

LABOR MATTERS.

Trouble in the Camp of the Knights of Labor.

CLEVELAND, June 2.—The Knights of Labor are in a high degree of excitement to-night. To-day three assistants to the Executive Board were elected. To-morrow the remaining three will be put through. The three men elected to-day were Jeremiah S. Quinn, a bookbinder of New York, William H. Miller, a carpenter from Richmond, Va., Hugh Cavanaugh, a shoemaker of Cincinnati. The "Home Club" so-called, of New York are credited with the election of Quinn. Delegates to-night made serious charges against some officials of the order, and declared that General Master Workman Powderly was scheming for political honor. They said that Powderly wanted to be Governor of Pennsylvania, and that he was conducting the order on Roman Catholic principles.

Mr. Powderly to-night said: "We will leave this city after closing one of the most successful meetings ever held, and all the money that the enemies of the Knights of Labor can spend in the effort to break us up will be spent in vain. The events with which the Home Club is charged with dealing transpired years ago. If they conspired against me then it seems to me that was the time to express its workings that I might guard myself against them. To bring it up now seems like holding a post-mortem examination on a four year-old corpse, and, as in a corpse of such an age, exposés will find only defeat. I have no political aspirations, nor would I accept the nomination for Governor of my State were it tendered to me unanimously."

INVITED TO JOIN THE KNIGHTS.

PITTSBURG, Pa., June 2.—The Amalgamated Association of steel and iron workers met this morning. The most important business was the reading of a letter from the Grand Master of the Knights of Labor asking the members of the Amalgamated Association to join that organization in a body. President Martin in response stated that the matter had been placed in the hands of a committee for consideration, and invited Powderly to visit the city and address the association.

PASADENA.

A Spirited Vindication—Important Purchase—Other Items of Interest.

PASADENA, June 2.—A TIMES representative was saluted this morning by an irate host of Pasadenans inquiring, "Who is 'H. T.' Where is he now, who dares to traduce the good name of Pasadena's representative men?" pointing to the communication in to-day's TIMES which charges the Trustee candidates with being favorable to the liquor traffic. The scribe retreated with visions of telegraph poles and tree limbs dancing in vivid fancy before him, but faintly responded, "No sabe." A portion of the justly indignant were appeased by an interview, while others, armed with shotguns, are hunting the invisible "H. T."

The TIMES man threw, *en masse*, the following question at some well-known business men, whose responses speak for themselves:

What truth is there in the statement made by "H. T." charging that the candidates nominated at the general caucus, for trustees of Pasadena, "are all in the interest of the liquor traffic?"

T. P. Lukens: "I say there is no truth in it. They are all solid men and opposed to saloons in Pasadena."

Geo. Mebarry: "The statement is too broad. I know personally that some of the men on the ticket are opposed to saloons in Pasadena."

C. S. Martin: "It's a condemned falsification. To my personal knowledge that favors saloons in Pasadena."

R. Williams: "I am one of the candidates condemned in that communication, and, while I do not seek the office, in self defense I emphatically state that the charge is no foundation so far as I am concerned, and I know the other gentlemen on the ticket are alike opposed to allowing sway to saloon influence in Pasadena."

DR. I. W. Elliot: "I don't think it is true. The statement is too sweeping altogether."

A. O. Bristol: "No truth in it. I know all the candidates and believe they are all positively opposed to saloon influence in Pasadena."

W. R. E. Ward: "The statement by no foundation in fact, and is utterly false. The gentlemen placed on the ticket will not jeopardize the good name of Pasadena."

J. W. Wood—"The statement of 'H. T.' is false. The nominees are good and temperate citizens in the best sense of the term, and will in nowise encourage the liquor traffic."

F. M. Goodrich: "I don't believe there is a man in the list of candidates but what will do all he can to suppress the liquor traffic in Pasadena."

Frank R. Ward—"H. T.'s' statement does Pasadena a great injustice. I am fully confident that every candidate will stand by Pasadena in the future as well as in the past in regard to the important question of the liquor traffic."

C. H. Converse—"I think that the statement of 'H. T.' in the TIMES of Wednesday relative to the nominees for trustees, 'all being in the interests of the liquor traffic,'" is without foundation. I am personally acquainted with some of them and know the contrary to be the fact."

To cap the climax the Star of to-day has the following terse quietus:

"We are authorized to state, after a personal interview with every individual nominated for city officers at the public caucus, that they will diligently and faithfully labor in the interest of temperance; will vote prohibition absolute and entire, if it can be constitutionally done, all reports circulating to the contrary notwithstanding."

A GOOD IMPROVEMENT.

A syndicate composed of Painter Bros. and other financially strong gentlemen, through their agent, T. P. Lukens, purchased yesterday about 30 acres of land lying at the northerly extension of Fair Oaks Avenue, paying therefor $31,700. The object of the syndicate is to straighten Fair Oaks Avenue from Chestnut street to a junction of said avenue with Illinois street on the Painter tract. The balance of right away will be secured without delay, when Fair Oaks Avenue will run straight from South Pasadena to the cemetery at the foot of the mountain.

The committee of sixteen met, this afternoon, at the Star office, and nominated W. E. Cooley as candidate for Treasurer, vice B. F. Ball, declined.

The Star, with its new Prouty power press, comes out to day in an able editorial, declaring for Blaine and Logan as its Presidential candidates for 1888.

The Pasadena Central School will close its term on Friday with a picnic of the entire school, which, Professor Pierce says, will be held at Devil's Gate. The graduating exercises will be held in Williams's Hall next Tuesday evening.

Charles Saxion, of Sterling, Ill., is visiting Pasadena, and expresses himself greatly pleased with the climate, the country and the people.

WILMINGTON.

DECORATION DAY PROCEEDINGS.

Correspondence of the TIMES.

WILMINGTON, June 1.—Memorial Day was duly observed here yesterday. The "Shiloh Post, G. A. R." came down from Compton and united with our people in celebration of the day. A grand procession was formed at 2 p. m. and the graves of the soldiers visited and decorated. A meeting was then held in the park, where addresses were made by Col. Mudge and Rev. Linsley, and appropriate recitations given by Misses Folkmans and Beneath. Bun.

Young Republicans.

The Young Men's Republican Club will meet at Manufacturer's Hall to-morrow evening. A grand rally is desired, as a military company will be organized under direction of Capt. James Warren.

Incorporated.

Articles of incorporation were yesterday filed by the Exchange Block Company. The object is to buy, sell and improve real estate and to carry on a general merchandize, manufacturing and hotel business. The principal office will be in Pasadena. The Directors are: Robbins Little of Los Angeles, George A. Swartwout of Pasadena, Alex. Cruickshank of Pasadena, Edwin Ward of Long Beach, and Edwin C. Webster of Pasadena. Capital stock, $100,000, all of which has been subscribed.

INSOLENT PUPPIES.

Respectable Ladies Subjected to Insults from Street Rinaldos.

Of late many ladies have complained of insults they have met at the hands of loafers who congregate on street corners and in front of saloons, and use indecent language in the hearing and presence of ladies who are compelled at times to walk the streets alone. At a place on Spring street, near the post-office, a quartette of "big bullies" seem to make it their headquarters, proving themselves obnoxious to passers-by. Yesterday afternoon, at this place, a lady was insulted while in the company of her husband. Some in large quantities of raw hide might have a soothing effect upon this hideous kind of humanity, whose means of livelihood is generally from the earnings of some fallen woman. If they were put in the chain gang, where they belong, the police would receive the thanks of the community.

ENLARGED SHEET

THURSDAY, JUNE 3, 1886.

Contagious Prosperity.

"A little leaven" says the Bible, "leaveneth the whole loaf," and, on this hypothesis, Los Angeles has been the yeast-cake for all of Southern California.

Emerging from the depressing conditions of a few years ago—financial reaction, a dry year, railroad monopoly, lack of confidence—it was Los Angeles which first took a vigorous start ahead, inaugurating the era of better times. Prosperous seasons, railroad competition and the influx of immigrants were the chief factors in the new order of things. The city began an amazing growth which has sufficed, in four years, to advance it from 15,000 to 45,000 inhabitants, and every property interest, industry and trade here has felt a corresponding stimulus. From the city the tidings of prosperity radiated in every direction, and the outlying sections of Los Angeles county were not slow to respond. Struggling settlements of the preceding years grew into towns, and some of these towns have more recently transformed themselves into cities. Vast areas previously unoccupied were purchased by speculators, subdivided and sold, and these, now settled and planted, form the nuclei for still further towns, villages and cities. All through the desirable horticultural and agricultural sections of the county the greatest activity now prevails, and with it the greatest confidence and prosperity. The healthiest feature of the boom which we have enjoyed has been that the country has advanced and developed in equal measure with the city.

But the leaven thus started in fermentation did not stop with the boundaries of this county. San Bernardino county on the east also commenced on a rise, and the same holds good there of the doubling and quadrupling in population of the older settlements, and the creation of new colonies where none existed before. Colton loomed up into a railroad center and a distributing point; large accessions were made to the arable lands of Riverside, which were promptly occupied; San Bernardino realized her long deferred hopes of a railroad connection, and a host of new colonies went trooping along.

San Diego County sent forth the invigorating breath of new life, which, standing in the doldrums, has been experiencing a genuine boom, and she deserves her prosperity in fullest measure.

Up the coast this healthy infection, if it may be so termed, is spreading. Santa Barbara, the beautiful virgin who so long slumbered and slept with oil in her lamp, has awakened and gone in to enjoy the bridal feast, not being barred on account of tardiness. With the prospect of a railroad ahead, great prosperity awaits the little city by the sea.

And so the wave broadens around the common center where the pebble of success was first dropped.

The development which awaits the coast counties is well shadowed forth in the following, which we find in the San Francisco Chronicle:

"People are not generally alive to the far-reaching effects which the boom will follow the completion of the Southern Pacific line from Soledad to Los Angeles. The new road will open to settlement a territory that could support a population twice as large as the entire present population of the State. There are no portions of California finer than the valley of the Salinas, and the lands between the Coast Range and the dry level plain throughout San Luis Obispo, Santa Barbara and Ventura are almost equally promising. In the bulk of this territory irrigation is not a necessity. At San Miguel they have as heavy a rainfall as we have here, and the few old settlers who have ranches near the Mission report that they do not lose a crop from drought, even for a dozing year since the country was first settled. The soil, which, in the valleys and foothills, is a black gravelly loam, will grow all varieties of citrus fruits, besides the olive, the fig and the grape; wheat and barley do very well, indeed. Yet this section of the State may be said to be almost uninhabited.

"This is not the work of accident. San Luis Obispo has been devoted for years to cattle ranges. The cattlemen have discouraged settlement, going so far in some instances as to cut or burn down fruit trees in order that they should not appear as living witnesses to the fertility of the county. They have divided the county between them, claiming vast tracts of land which belong to the public domain, and where settlers tried to establish farms have driven them off by threats and violence. In the absence of a fence law it has been vital to them to prevent the cultivation of the soil by small farmers, and they have stuck at nothing to prevent their coming. Hence this grand county, with a capacity to grow the rarest and most valuable fruits without irrigation, has been considered worthless except as a cattle range, and has been monopolized by a few score of individuals who have not even owned the lands they occupied.

"All this is now going to be changed. The railroad will bring into San Luis a class of settlers who will hold their own against the cowboys. Lands which have borne nothing but bunch grass and wild oats will now blossom with the orange and olive, the grape and the plum; and the consequences to the State commercially, financially and politically will be striking. Los Angeles will have to bestir herself to hold her own in the ground position of supremacy which she now occupies."

If the Chronicle will make a careful note of the situation it will find that Los Angeles has been bestirring herself for the past few years, and is now engaged in that wide-awake occupation. Our merchants and manufacturers are well aware of the fact that the entire southern end of the State, now teeming with prosperity, is commercially tributary to the city of Los Angeles, just as the central part of the State is tributary to San Francisco. To make the tribute good, however, it requires enterprise, push and open-handed dealing, and we think our merchants appreciate these facts also. With the advantage of competitive railroad rates with the East and a free water-way in the West; with the lines of trade already established here and a fine market assured; with abundance of wealth and enterprise enlisted in our behalf, no other city can wrest from Los Angeles the commercial supremacy of Southern California.

ORIENTAL PICNIC.

Letter from the U. S. Consul at Jerusalem.

A VISIT TO MANY SACRED PLACES.

Bathing in the Dead Sea and in the River Jordan—Judas Iscariot's Sour Apple Tree.

The TIMES is indebted to Dr. A. J. Arbesly, of this city, for the following letter, written by his brother, Nageeb J. Arbesly, U. S. Consul at Jerusalem, to a friend in Washington:

My Dear Friend:—I have been so long wanting to write you a good, lengthy letter from this holy and historic city; but somehow circumstances have been such as to deny me the pleasure of correspondence. I have often thought of you and in my wanderings and rambles over the hills and dales of Judea, have wished you might see and visit the many sacred places of interest which I saw and am seeing every day.

I have just returned from a trip to Jordan and the Dead Sea, during which I took in Bethlehem, Hebron and the famous convent of Mar Saba. A short account of my experience will not be out of place, I trust, in this epistle.

Early in the morning of a bright and lovely day, such as are to be had only in the mild and genial climate of Palestine, four of my friends from the different Consulates got up an extensive picnic in order to give me a chance to visit the places of interest to which the tourists all over the world direct their footsteps. I rode part of the way a camel which I exchanged for the fiery steed of an Arab Sheik who insisted I should ride his favorite hassan (horse) except the "American liey" who speaks such good Arabic. He was along with us as a protector from the tribes living this side of the Jordan, and his horse is the finest animal in Palestine. I shall never forget the luxury of my ride and the pleasure of the trip. We left Jerusalem, descending into the valley of Gihon, the boundary line between Judah and Benjamin, where I saw the tree whereon tradition asserts Judas hung himself, and the well of the Magi whereon they drew water after leaving Herod, and in so doing saw the guiding star reflected in the water. We passed the convent of Elijah on the site where he lay for rest during his flight from Jezebel. The story of Jacob's devotion to his seven-years'-wooed wife, Rashel, came very near home to my mind as I gathered a few ferns from his tomb for a souvenir. Please see the 33th chapter of Genesis for particulars of the touching story. At this point we were in sight of the holy city where *"verbum carum factum est"* "The Word was made flesh and dwelt among men," Bethlehem, the ancient city of Jesse, David, Ruth, Naomi and others. There are so many events connected with this city, the cradle of Christianity, that time and space would fail me were I to single out the ones which came to my mind as I read my Bible for details in the different narratives. My object in this letter is to give you a birdseye view of what interested me, hoping it may cause you to share, at a distance, the pleasures attending such a trip as I was allowed to make. One could not look upon the group of women in their picturesque costumes standing on the roofs of their houses gesticulating and jabbering to one another in earnest conversation, without thinking of that group that once surrounded Naomi, the sorrow-stricken widow returning to her native town and hearing the people say as they looked at her pale, haggard face, "Is this Naomi?"

It is charming to look upon the corn fields, with their green blades waving in the morning air, and to think of the grand mother of David, Ruth, who afterwards became the ancestress of Christ. I never read a romance which had a tithe of the interest which this story has.

Truly, Bethlehem is the city of David. It was here and in these valleys that he rang out those glorious songs which have echoed through the whole world and been the keynotes to new melodies in every believer's heart. It was from behind a thicket that I stood declaring the glory of God, and cry out with humility and faith, "What is man that Thou art mindful of him?"

The town is six miles from Jerusalem, and has four thousand inhabitants, celebrated for their ruddy beauty; also, for their inclination to war, like David.

Among the sights which interested the most is the "Church of the Nativity," the oldest monument of Christian architecture in the world, and within it the grotto of the Nativity, which is twenty feet below the floor of the church and approached by two spiral staircases and decorated with numerous lamps, figures of saints and various other ornaments. On one side of the grotto is a recess where a silver star on the pavement indicates where our Savior was born, and close by is an altar held in common by the different Christian sects, where are lamps always burning. Near by one could see the manger, and the altar of the Magi where they are said to have presented their gifts. After paying a visit to the venerable Bishop of Bethlehem (who, by the way, I found to be a former pupil and friend of my father) we went to the grotto of the Shepherds, fifteen minutes' ride from Bethlehem. There is a chapel in it, built in commemoration of the shepherds beholding the vision of the angel.

We directed our steeds, after casting the last gaze upon the glens and historic hills of Bethlehem, to the convent of Mar Saba, where fifty hermits from the clergy of the Greek Church spend their time in seclusion from society and the world. The scenery is wild and utterly barren and desolate, like those poor fanatics in the convent, which is the strangest place that human ingenuity ever contrived to call a dwelling place. It is a series of precipices with walls of natural rock and artificial battlements filled with the cells of the monks. The founder is one Saba of whom many odd stories are told. The idea of building this weird place in the Fifth century. The Persians plundered it in 614 and killed hundreds of the monks, whose skulls are still to be seen in one of the subterranean chapels of the remarkable structure; also the tomb of the founder, as well as that of the famous theologian John, of the Eighth century school. The principal occupation of these monks seems to be the manufacture of souvenirs which they sell to the travelers (among whom the ladies are never allowed entrance to the convent).

Leaving this place, we passed through the valley of the Kidron on toward the Dead Sea, called by the Arabs Bahar Loot (Sea of Lot), which measures forty-six English miles in its greatest length, and ten and one-half in its greatest width, and lies at 1,300 feet below the level of the Mediterranean. Here I indulged in a plunge, going about one mile and a half distant from the shore. The water is so salty, but could not, on the contrary, I stood erect in the water, with a good portion of my body out of it. After my bath, the effect was very unpleasant. My eyes burned as if caustic had been applied to them, and my skin was covered with white flakes, which the oily water had caked upon it. Fearing an irritation of "Adam's first garment" I plunged into the pure, fresh stream of old Jordan and filled the air with the melody of "On Jordan's stormy banks I stand." I got some water from the Dead Sea and analyzed it in Jerusalem and the result showed chloride of magnesium 10½; of potassium 1 1-3; of sodium 6½; calcium 2 4-5, with a specific gravity of 1200.

We returned to Jericho, after passing through a great expanse of wilderness where John the Baptist's voice rang out, "Repent ye for the kingdom of God is at hand." There I witnessed a Bedouin dance and festival which was exceedingly interesting and novel. On the following morning we were all on our way to Jerusalem which we reached after eight hours' ride. This much for my trip, further details of which I hope to give you in another letter.

THE MODERN STEED.

Some of its Advantages and a Serious Drawback.

Exchange.]

Daily the bicyclers are becoming more numerous on the streets. The steeds are high priced, but they are easily kept, require no "condition powders," don't need the skillful services of Anderson in shoeing, dont scare at the cars or elephants, the rider is not in danger of arrest for cruelty to animals by Humane Agent Cole, you are not bothered by every horse jockey you meet stopping you to look at the steed's teeth as the physician looks at the patient's tongue, have no use for a curry-comb or veterinary surgeon, and, in short, when you get such a steed the purchase is the end, not the beginning of expense. There is but one trouble. In ye olden time, when men rode on horseback because they had no bicycles, they were in the habit of taking their girls on behind, the arms of the girls encircling the waists of the young men to keep from falling off. This cannot be done with the bicycle as now constructed, and then what young man could ride a cycle when feeling himself in the embrace of his girl? After all, the old way had its good things.

Santa Ana Items.

Santa Ana Standard.]

The Women's Christian Temperance Union has re-organized in Santa Ana and meets in Good Templars' Hall every Tuesday afternoon.

Grapes are selling nicely on the Muscat vines this season all over the valley, and it is safe to assert that a finer prospect for an immense crop was never seen in the State. The bunches are of a very large size this year.

The barley hay crop in the Santa Ana valley is the heaviest and finest in quality ever known, and, we might add, is the cheapest. We have heard that in the neighborhood of Anaheim hay had been offered in the field at three dollars per ton.

Santa Ana proposes building another splendid new school house soon to keep up with the progress of the age.

The Orange depot is going up rapidly, and will soon be ready for use. It is about 80 feet long.

The Santa Ana Herald says: "On Wednesday of last week, Mr. Jones, of Newport, killed a big cinnamon bear in the Trabuco mountains, who had just destroyed twenty stands of bees. One shot from a heavy Winchester finished the big brute, which measured nine feet from nose to tip of tail, and weighed, probably, 1000 pounds. It is supposed there are quite a number of bears in these mountains."

Subdivision of the celebrated Cooperative Nursery Tract. Grand sale of 482 beautiful residence lots, each 50 feet front, including 15 extra large size corner prize lots, on South Main street, near Jefferson, at $250 each, on easy instalments, without interest. With these lots are included ten beautiful and expensive cottages, four mast electric lights, ample and heavy plank sidewalks in front of every lot, 14-year-old seedling orange trees; also bearing grapevines—all of which improvements are free to subscribers. Books for subscription will be open on and after Thursday, April 29, at J. M. BATCHELOR & CO.'S, Real Estate, Auctioneers, 236 North Main street, Baker Block.

The owner of this property respectfully refers to His Honor Mayor Spence, President of First National Bank; President John E. Plater, of Los Angeles County Bank; President Geo. H. Bonebrake, of Los Angeles National Bank.

A very unusual opportunity to obtain a lovely home in the most beautiful southern suburb of Los Angeles.

Four hundred and eighty-two lots for sale and none within a mile of any one wishing a home of their own at less rates than house rent can be obtained.

Over one-half of these lots contain 14 year-old seedling orange trees—not common oranges remember. A few lots of this section afford a good family living. One-third of these lots are covered with the three best varieties of bearing grape vines. All but a small portion of the remainder is in 11-year-old full bearing seedling orange trees.

This estate, sightly and well situated, noted for the care it has always had, with high, level ground, way above any possible overflow, is the gem of the city.

The scenery in every direction is of great extent and beauty. Situated 2½ miles south of the Postoffice, on the chief thoroughfare of Los Angeles, directly in a line with the heavy or more valuable business growth of the city. No other street contains such valuable property. This fact is most important and should be remembered by those looking for lots in the city of Los Angeles. But ten minutes' drive north of this site, on the same street, lots of same size sell for $2000 each.

TERMS—Cash; or, $50 cash, $15 in 1 month, $15 in 2 months, $10 in 3 months and every month thereafter until $250 is paid.

Subscriptions will be received at above rates direct by the owner, whose responsibility is of the highest class.

A meeting of all subscribers will be held on or about July 31, 1886, for the purpose of selecting the lots subscribed for. At this meeting a committee of three will be appointed by the subscribers. The name of every subscriber will then be read aloud from written slips of paper, which will then be placed in a suitable box, from which, when all the names are placed therein, will be drawn by the committee, one name at one time. The name, when read aloud, permits its owner to select the best lot from the entire number unchosen.

A deed will then be made out, and the subscriber can take immediate possession. The deed to remain in the owner's hands until the full $250, the price of the lot, shall be paid. To give every subscriber a fair chance, no one name is entitled to select not more than one lot containing a dwelling house, nor is one name entitled to select more than one-half the lots that name subscribes for either on New Main or San Pedro streets, except in case of two lots only in one name. These dwellings are to be beautiful structures in every respect, complete in all appointments, and ready for occupancy without any additional expense. Their cost of construction is a comparatively large figure. Plans and designs may be seen at our office, J. M. BATCHELOR & CO., Real Estate, Auctioneers, 236 N. Main street, where the subscriptions are now received. Maps to be had and every information on application.

The Main street horse-car line has already arranged to go to the corner of Main and Jefferson streets, within five minutes' walk of the tract, and will be extended to pass the tract on demand of a sufficient number of new residents.

A second horse-car line is projected to pass within a block of the entire east side of the tract, which extends nearly one mile on San Pedro street. Also the main line of Col. Howland's Electric Railroad will run either past the entire tract on San Pedro street or within a parallel block, on its way out of the city. The Santa Monica Railroad has now a flag station within five minutes' walk of the tract, so there will be no lack of conveyance to and from the center of the city. The water on the ground is of the best quality. It can be tested at the laborers' house on San Pedro side of the estate. Water will be piped from the city mains as soon as there is a sufficient demand.

The property lies close by the University of Southern California, affording a first class education for the young, within easy walking distance.

Teams leave Baker Block daily, including Sundays, at 9.30 a. m., 12:30 p. m. and 3 p. m. Fare 5 cents.

FINANCE AND TRADE.

OFFICE OF THE TIMES,
Los Angeles, Wednesday, June 2.

Trade in Grain Bags continues active and prices have been advanced ¼ cent all around. The season being early, the demand is mainly for spot or near delivery. There is little or no inquiry for July options.

The following are the San Francisco quotations, the market here being generally ¼ cent higher on account of freight: 6¼ spot cash, 6¼c buyer June, 6¼c buyer July, August, September, 6¼ @ 6⅜c sellers' option.

The last cut in Sugar brings the prices of all grades down lower than they have ever been on this coast. These low rates are a little puzzling in view of the fact that canners are now buying freely, and the consumption of Sugar is larger during the summer months than at any other season.

For the last week in May, five vessels were added to the Wheat fleet. Two of these were iron vessels for spot loading at 30s 9d and 35s for Cork. The other three were chartered prior to arrival for June loading and later on.

Stocks and Bonds.

By Telegraph to The Times.

NEW YORK, June 2.—Government bonds dull; steady.

The opening prices of stocks were from ¼ to ⅝ per cent below the closing figures of last night, and further declines followed but were soon checked, and the market became quiet and rallied for small recoveries. This was followed in its turn by another sharp decline and another fractional rally, followed by a dull market, but late in the afternoon there was a noticeable increase in the business done and a strong undertone to quotations. The market advanced slowly, but steadily, until the close which was at or near the best prices of the day.

State Convention Assembled in Los Angeles.

THE GIFT OF THE GOOD TEMPLAR LOT.

Addresses by Rev Miss Kolloch and Miss Emma Harriman—The Great Accomplishments of the Order.

The Woman's Christian Temperance Union of Southern California convened in special session, yesterday, at the Congregational Church, Mrs. Olive A. Bird, State President, presiding.

The primary object of this convention is to incorporate the Union, so that it may be competent to hold property and otherwise be a "legal entity." The occasion for action at this time is the formal offer of a building site by Merrill Lodge, I. O. G. T., admirably situated for W. C. T. U. headquarters.

The ladies, with characteristic good management, took advantage of the presence of so many visitors to arrange a series of interesting public meetings.

The exercises were opened by scripture, song and prayer, led by Mrs. Ransome, whose kindly face and silver hair are so well known among those who know suffering and sorrow.

Then came the numerous details incident to such a gathering. The delegates from various places were marshaled out and in among the pews until those from each place were seated by themselves.

The committee on credentials reported seventy four delegates present. As the State Union is composed of about 100 delegates, representing some 800 local members, this attendance was largely in excess of the required majority.

A communication from the trustees of Merrill Lodge, offering the property referred to, was read by the secretary, Miss McCulloch. Also articles of incorporation, prepared by Will D. Gould, Esq., and Judge J. D. Bicknell, together with a letter expressing the opinion that the articles were correct and sufficient.

Miss Emma Harriman moved that the articles be adopted, and five trustees elected in accordance with their provisions. Several questions as to the power of the Union to mortgage property, loan money, etc., were answered by Mr. Gould, at the President's request, who explained that the articles were arranged so as to give every power allowed by the laws of the State to fraternal societies.

A rising vote to incorporate was taken, and was unanimous.

A suggestion that the five general State officers—President, Vice-President, Treasurer and two Secretaries—constitute the Board of Trustees under the articles just adopted, was changed to a motion and voted on by ballot, resulting almost unanimously in its favor.

E. B. Owen, Notary Public, who volunteered his very necessary services, then came to the front and called upon each of the voting delegates to come forward and sign the Articles of Incorporation.

The time thus occupied was enlivened by social chat, and by an organ solo in Mrs. Fiske's incomparable style.

A hearty vote of thanks was given to Mr. Owen for his patient waiting and valuable services; and to Messrs. Gould and Bicknell for their careful and accurate work in preparing the Articles of Incorporation, and for their counsels and opinions.

Evening Session.

The evening session was opened with an organ voluntary by Mrs. Fisk; hymn by the audience; scripture by Mrs. Keyes; prayer by Mrs. Greene, of Vermont, and a vocal solo by Mrs. W. W. Buckingham.

Rev. Miss Kolloch, of Chicago, was introduced, to answer the question "What is the Woman's Christian Temperance Union?" It is only necessary to examine this organization and its methods of work to see that its wide scope includes almost every important branch of philanthropic work which the human race needs. There are 10,000 unions and 200,000 members. This great body works in thirty-nine different departments, offering opportunity for each one, no matter with what talents, to lend a hand. To the sick and suffering; to the ignorant and misguided; to the young and tempted; to the discouraged and fallen; to all this great army of unfortunates the W. C. T. U. brings a heavenly message. Their methods of work must commend themselves to all thoughtful people. They recognize in the child the greatest possibilities. Reformatory work, though affording many telling exceptions, yields but meager returns for the great efforts exerted. But in preventive work—the education of children—there is "promise of great results. Hence the introduction of text books on stimulants and narcotics, and the action of legislatures making their study compulsory. If less evil is put liquor before their lives they shall not do it ignorantly. The kindergarten is where the solution of the great labor problem must begin. Although the Eastern cooperative schools in Chicago, under the W. C. T. U., are largely of foreign birth, their teaching will make them better citizens than socialists, communists and anarchists. Day nurseries care for several hundred children every month, whose mothers, being obliged to work away from home, would otherwise lock them in closets, or leave them amid the worst influences. The poem, "For them is all work, and women must weep," although perhaps sometimes true, is here more frequently, "For them will kids and women must work"—to keep the little ones from starving.

The National Temperance Hospital, recently opened by the W. C. T. U.; the work against pernicious literature; the kitchen garlens, where girls are taught practical household housekeeping; the free reading-room for erring women, with pleasant surroundings, and kind words from woman to woman; these and many other lines of work give an idea of the comprehensive philanthropy of this great organization.

Miss Emma Harriman, so favorably known by her former addresses, spoke succinctly, but briefly, of recent W. C. T. U. temperance victories. Everything must show fruits that can be measured. The W. C. T. U. is not behind in this respect, as has been more work in the last two years than ever before. Iowa and Kansas have prohibitory laws that do prohibit,—notwithstanding the last display of the daily papers of an occasional evasion. In Atlanta, before election, business was suspended; every one talked of temperance; excitement ran high; and white ribbons were so thick that the liquor men adopted a red one. Prohibition was carried, and a day Atlanta was free as Topeka. As the Scientific Instruction bill has become a law in many States, perhaps half of them, it is too late to count. When the Yankee was asked in England how many states in the Union he said he didn't know, and the surprise of the questioner replied: "I know how many States we had when I left, but they may have added two or three or annexed Ireland meantime that time."

Even in the Sandwich Islands, where we used to read of cannibals, they are translating our scientific temperance instruction books. Half the school children in the United States are now studying the effects of alcohol, tobacco, opium, etc. It has remained for Washington Territory to accomplish the greatest amount of moral legislation ever known in a State in one year. Women have held there for two years, and each one being thus equal to two or three women elsewhere, they have greater influence with the law makers. They secured the scientific instruction; the removal of pernicious literature from penal institutions; the protection of girls under sixteen, and local option. This latter is the best of its kind. Fifteen voters can call a meeting to vote on license. As women are voters, you may be sure it will be called. If the vote is for prohibition, they can not only refuse licenses, but can at once close existing saloons. The women are troublesome jurors—to the prisoners; but highly satisfactory to Chief Justice Green, who says he never before met such quick and clear justice. There are too many victories to be even mentioned in a short address. They are coming from every side. The recent ones most have a word. Rhode Island has voted for constitutional prohibitory amendment. After only two weeks of preparation, a large excess of the required three-fifths was obtained. The National Scientific Temperance Instruction bill has just been passed by Congress almost unanimously. It sets apart $15,000 annually for the District of Columbia, the military, naval, Indian and colored schools. We have no selfish ends to gain. We are proud of our Union. No MacGregor was ever so proud of his plaid as we of our white ribbons, and we mean to carry them into the thickest of the fight until our efforts are crowned with success.

Rev. Mr. Brosee spoke of the gift to the W. C. T. U., and said they had the exact intention of putting up a $15,000 block on it. He would not ask the audience for that amount, but merely for a trifle to cover current expenses.

Mrs. Buckingham gave a solo, in a very pleasing manner. Rev. Mr. Wells spoke briefly, saying that sooner or later, with the help of the women, prohibition would surely be accomplished. He made various interesting points, and gave illustrative anecdotes.

The whole meeting was full of good cheer and the audience, which filled the church, were deeply interested throughout.

This morning at 9:30, and again at 2:30, the convention will continue its sessions. The public are invited to attend any or all the sessions.

This evening there will be a lecture by Mr. Green, President of Vermont W. C. T. U., Superintendent of National Kindergarten Work, author of "The Pathway of Life." etc. Subject: "Shall Our Children be Free?" All are invited. Admission free.

MOVING.

The Boyle Heights Electric Road Reports Progress.

W. H. Workman, the father of Boyle Heights and the projector and moving spirit of the Boyle Heights Electric road, publishes a notice in the TIMES to-day calling for bids on the grading of the roadway for his new enterprise. Mr. Workman has advices that the rail left Pittsburg April 17th. They were delayed in transit first by the St. Louis strikes, and latterly by the washouts in New Mexico. Tracers have been sent from both ends of the line with the object of ascertaining the whereabouts of the delayed iron and hurrying it along. The ties are on their way from Mendocino county. Plans for an iron truss bridge to be attached to the First street bridge, on the south side, have been prepared by the San Francisco Bridge Company, and will probably be adopted. The cost of this structure will be about $5000.

The road will run from the center of town to Evergreen Cemetery, a distance of about 2¼ miles. Mr Howland has secured the electric apparatus and it is now on the way to Los Angeles.

THE LEVERING TRIAL.

A Case that is Keeping a Jury Out of their Blankets.

Yesterday the attention of the jury trying the Levering case was entirely taken up by the arguments of counsel. The charge by the Court, which came after ward. was of unusual length. At 3:05 o'clock p. m. the jury went out and remained locked up until 10:30 o'clock p. m. when Judge Cheney called them in and asked if they had agreed upon a verdict. The foreman replied that they had not, and that he thought there was no reasonable possibility of their agreeing. Several other jurors were of the same opinion. The Court said he was under the impression that they would be able to come to an understanding and ordered them back to the jury room for further deliberation, after which the judge went home. It is understood that they stood ten for conviction and two for acquittal.

Cheap Fuel in Los Angeles—The Problem Solved at Last.

In company with A. L. Austin and a number of other gentlemen, a reporter for the TIMES, yesterday, visited a compartment of the Spring Street Market to inspect a new heating apparatus which has been brought to Los Angeles by E Burns. A detailed description of the machine is not possible in the columns of a daily newspaper, but it is proposed to give a few points sufficient to interest the public and induce them to go themselves and examine a very remarkable invention. This new method of furnishing heat can be applied to any ordinary stove or furnace, from the smallest pot burner to the largest engine boiler at an average cost of about $15 and when one examines it, it is as simple as A B C, or the wonderful egg of Columbus, after one is told how it is done. The whole apparatus is arranged about as follows: Attached to a can of crude petroleum—the cheapest of fuel, costing two cents per hour for the largest stove—is a small pipe running into that part of a stove where the wood or coal is usually turned; tapping this pipe is another, flowing pure water from an automatic spigot. The combination of the petroleum and water makes hydro carbon, which produces an intense heat, free from all odors and dangers. This is all there is of it. A child can work it with perfect safety. A stove can be hot or cold in an instant, and all of a family's cooking can be done at an almost indistinguishable cost. Simplicity and safety are two of the greatest charms of this invention. Everyone should embrace an opportunity to inspect it, and see for him self, for it is truly wonderful. A. L. Austin, and a syndicate of Los Angeles gentlemen have bought the exclusive right for Southern California and several other States at a large outlay of capital, and propose to supply the people here at an early date. A large number of orders have already come in, and are filed away to be filled at the earliest practicable moment. It is not too much to say that this new wonder will work a real revolution in this section, and, apart from all private interests, be a benefit and a saving to the entire community.

Hall Hauled In.

Peter Hall, alias Jack Ball, a hanger-on of the Club Theater, was arrested yesterday by Deputy Sheriff Will Hammel, on advices from Fresno, where Hall is wanted for a robbery. The nature of the robbery and its total amount is not mentioned; but from the appearance of Hall and the articles stolen, some soiled dove was the probable victim. The loot included a $150 pair of diamond earrings, a number of $50, $20, $10 and $5 bills, and some gold pieces.

The People's Store's Pictures.

It is one way we have of advertising our worth as merchants in this community—giving away pictures with $6, $12 and $20 purchases. We want to bring home to every man, woman and child that can be reached by us in any way, manner or means the fact that the People's Store is the cheapest place in the state to do your trading. We want you to come into our stores and buy $6, $12 or $20 worth of merchandise, and with it we give you a painting, oleograph or chromo, as you may select.

We want you to ascertain that the People's Store does the business of the metropolis, because it sells cheaper than anyone else, because it has better goods for less money and is content with less profit. We give you the pictures to attract you to our store—once you are purchased a bill of goods we have made a customer, and you will come again. The pictures are worth in money half or more what you purchase to get them. They are executed in handsome gilt frames and are 19x16 inches for $6 purchase; a plaque in oil 16x28 inches for the $12 purchase, and a painting in oil, oleograph or chromo 30x36 inches, set in an embossed gold frame 3 inches deep. They rep ent the most romantic and picturesque spots in the world. We remained three months in New York at the tail end of the season with two buyers, gathering in all the bargains of a late market. We have pictures to offer you that cannot be duplicated in this state. If you will let us show you our goods and prices they will put to shame all others.

HOW MAIN STREET LAND

Is Given Away.

Fourteen-year-old seedling orange trees have an auction value; $15 each is an extremely low figure. No farmer would contract to grow them for that sum. It would not begin to pay him for his labor. In fact he would ridicule such an offer. Twelve trees to a 80x110 foot lot at that price would equal $180. The city improvements, such as ten hour ideal dwellings, heavy plank walks, electric lights, etc., nearly exhaust the difference between $180 and $350, the price of each lot on the Co-operative Nursery Tract. The corner therefore asks less than cost of improvements, the land is thrown in free. This is why the offer of the Co-operative Tract is the lowest ever made in this city. There is not a capitalist in Los Angeles who would agree to furnish like improvements for $350, that is, contract to take new land and put on it what we offer, waiting 14 years for his money.

So practic lly a fine and sightly piece of land is given away without charge. Examine this offer every way you choose, realize the tract's location, in a direct line with the city's growth, on the highest priced street; we have, you may then understand that a small investment at our figures will return you many fold increase within a very few years.

There is not a flaw of any kind in the property; every detail is perfect, including the title. This is a forced sale. Otherwise no such price would be made. The reason is explained by the statement.

Many subscribers have already realized what we say; a large proportion of the lots are already sold. The remainder are already taken, if we can only rely on the promises of apparently sincere people. Five years hence this tract will be as near the city proper as Fourth and Main are now. What surer investment can one make. No other securities can begin to give him an increase. Men around the cities in the United States. How many of their wealthy inhabitants became wealthy by real estate investments? Look at the United States statistics. What is the growing wealth of our people? Nine-tenths and more composed of real estate. Then do you know anybody who has not largely profited themselves by investments in real estate in Los Angeles? We do not. Many have become rich thereby. Don't hesitate, but invest a little. Our installments permit you to advantage yourself with a light or no inconvenience.

Call for particulars, maps, etc., on J. M. Batchelor & Co., managers, 326 N. Main st., Baker Block. Open Saturday evenings from 7 to 8:30 o'clock.

The Crowning Success

OF THE SEASON.

One-half the Price of Adjoining Unimproved Property.

THE CITY CENTER TRACT.

151 lots at $390 each. Size of lots 50x128. First payment, $30; monthly payments, $20, without interest.

Elegant improvements Made by the Company without Cost to the Lot-Holder—four Villa Residences to be Erected and to go with the Lots Without Additional Charge—First-Class Plank Walks on all the Streets—Main, with Electric Lights, Free for One Year—The Distribution of the Lots will be Made on the 4th of October, 1886, on the Same Plan as that of the Child's Tract and the Urmston Tract, Both Inaugurated by this Company Under the Homestead Law.

THIS SPLENDID TRACT is in the very heart of Los Angeles, but one block from Pearl street, and situated on Eleventh, Twelfth and Pico streets, adjoining on the latter street the elegant grounds and mansion of Mrs. Foreman.

THE HOWLAND ELECTRIC MOTOR RAILWAY is now an assured fact on Pico street; the rails are on way here, and the cars will be running in sixty days.

The price of these lots is exactly one-half of the sum asked for those adjoining on the east, and which are unimproved.

The success of the Homesteads of the Southern California Land Company is entirely owing to the low rate at which they place their properties before the public, and the fact that they offer only first-class City locations. The high prices asked by middle men for lots are avoided. The Company desire to see the subscribers to these properties gain a handsome profit after the division of the Homesteads.

The sale of this Tract is on the Homestead plan (see Law of 1862), as the Child's Tract and the Urmston Tract. The land is sold as an entirety, and delivered over to the subscribers with all the improvements of villa residences planted sidewalks and electric lights, without further charge than the amount received in the aggregate from the subscribers, each one of whom has a vested right in the entire Tract.

The meeting of the subscribers for the distribution of these lots is fixed for October 4th, 1886.

The proceedings will be in accordance with the agreement recorded in the subscription book to the Tract, and signed by the purchasers.

No narrow streets. All streets and avenues are sixty feet wide.

The Street Railway on Pearl street, corner Pico street, is within one block of the Tract, and in sixty days Colonel Howland's Electric Motor Road will be completed, and cars running on Pico street past this entire property.

SOUTHERN CALIFORNIA LAND CO.,
No. 265 S. Main street.

LEGAL HOMESTEADS.

THE best lawyers in Los Angeles state that the Childs Tract, Urmston Tract and City Centre Tract Hom steads conform strictly to the Law of the State in making a division of the property among the purchasers—each purchaser holding a vested right in the whole Tract until the meeting for subdivision of interests.
